Abstracts

Meat and poultry processing, an important segment of the food industry, refers to the comprehensive production activities involved in slaughtering, cutting, cleaning, preserving, processing, and packaging livestock (such as pork, beef, and lamb) and poultry (such as chicken, duck, and turkey). Processing methods include freezing, curing, smoking, cooking, seasoning, and ready-to-eat products, aimed at meeting the needs of household consumption, foodservice, and industrial use, while ensuring food safety, extending shelf life, and enhancing consumption convenience. The upstream of meat and poultry processing mainly involves livestock and poultry farming, feed supply, breeding, and veterinary services, providing the essential raw materials for slaughtering and processing. The downstream encompasses retail supermarkets, foodservice, cold chain logistics, and the food industry, responsible for distributing processed meat products to consumers and industrial users.
