## Abstracts

Starter cultures develop color and flavor and provide safety. The addition of any commercial culture to the sausage mix provides a safety hurdle, as those millions of freshly introduced bacteria start competing for food (moisture, oxygen, sugar, protein) with a small number residing in meat bacteria, preventing them from growing. It may be called a biological competition among bacteria. Global Meat Starter Culture key players include Chr. Hansen, Danisco, SOYUZSNAB, Kerry, etc. Global top four manufacturers hold a share over 70%. Europe is the largest market, with a share about 40%, followed by South America, and North America, both have a share about 45 percent. In terms of product, Maturation Starters is the largest segment, with a share over 65%. And in terms of application, the largest application is Meat, followed by Seafood, Poultry, etc.
