Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Mechanical Hacksaw Blade competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Mechanical Hacksaw Blade reciprocating cutting blade, typically made of high-speed steel (HSS), carbon steel, or bimetal composites, designed for use in mechanical hacksaw machines to cut metals, plastics, and other rigid materials with precision, durability, and efficiency. The mechanical hacksaw blade market industry chain begins upstream with raw materials such as high-speed steel, carbon steel, and alloy composites sourced from steel producers, followed by midstream activities where blade manufacturers design, cut, heat treat, grind, and temper blades with specific tooth pitches and geometries, often adding coatings for wear resistance, then moving downstream to distributors, industrial suppliers, and tool retailers who supply to metalworking companies, construction contractors, machine shops, and repair facilities, with the end market driven by industrial growth, infrastructure development, automotive and aerospace manufacturing, and small-scale workshop demand globally. Production of mechanical hacksaw blades typically involves precision cutting of alloy or HSS steel strips, followed by shaping and milling teeth using high-accuracy machines, then undergoing heat treatment processes such as hardening and tempering to achieve durability and wear resistance, after which grinding ensures tooth sharpness and dimensional accuracy, and surface treatments or coatings like oxide finish or titanium nitride improve performance, with advanced methods including electron-beam welding for bimetal blades, CNC-controlled tooth profiling, and automated quality inspection systems, while manufacturers increasingly focus on sustainability by optimizing steel usage, energy-efficient furnaces, and recycling scrap metal from production lines. 2024 Global Market Volume: 420 million units. Average Global Market Price: USD 2.0 per

unit. Market Average Gross Profit Margin: 18%.

The global Mechanical Hacksaw Blade market size was estimated at USD 840.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.00% during the forecast period.
