## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Medical Electronic Thermometer competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global Medical Electronic Thermometer production reached approximately 55.3 million units, with an average global market price of around US\$ 13.3 per unit. Medical electronic thermometers consist of a temperature sensor, LCD display, button battery, ASIC, and other electronic components. They can quickly and accurately measure body temperature. Compared to traditional mercury-in-glass thermometers, they offer advantages such as easy reading, shorter measurement times, higher accuracy, a memory function, and a beeping alarm. Furthermore, since they contain no mercury, they are harmless to the human body and the surrounding environment, making them particularly suitable for use in homes and hospitals. Global Medical Electronic Thermometer includes Berrcom and JASUN, etc. Global top two companies hold a share over 29%. Asia-Pacific is the largest market, with a share about 62%, followed by Europe and North America with the share about 16% and 8%. Market Trends: 1. Multifunctional Products Electronic thermometers are available in specialized models for oral, rectal, and axillary measurement. There are also universal products (basic, economy) that can measure oral, rectal, or axillary temperatures simultaneously. 2. Post-pandemic, Growth Returns to a "Cool-Down" Period. Covid-19 created a brief "Covid bubble" for the industry. In 2020, electronic thermometers experienced explosive growth, but the growth rate declined significantly in 2021. In 2022, most companies will continue to experience a decline, but overall, the degree of decline will be relatively low. In 2023, all major economies around the world will have lifted epidemic control measures. The market is now returning to normal development.

The global Medical Electronic Thermometer market size was estimated at USD 733.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.60% during the forecast period.
