## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Medical Grade Calcium Sulfate Dihydrate competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Medical grade calcium sulfate dihydrate (chemical formula:  $\text{CaSO}_4 \cdot 2\text{H}_2\text{O}$ ) is a high-purity inorganic compound that meets pharmacopoeia standards. It is purified and processed from natural gypsum ore. Appearance is white amorphous powder, odorless and tasteless, slightly soluble in water, insoluble in ethanol, low hygroscopicity but strong stability. Mainly used as pharmaceutical excipients, used as diluents, fillers or curing agents in pharmaceutical preparations (such as tablets and capsules). Global production in 2024 is expected to be approximately 54,600 tons, with an average selling price of \$17.30 per ton. Annual production capacity for a single production line typically ranges from 3,000 to 5,000 tons per year, with a gross profit margin of around 24%. The industry growth of medical-grade calcium sulfate dihydrate is primarily driven by the growing demand for high-purity excipients in the medical and pharmaceutical industries. Furthermore, the improvement of healthcare systems in emerging markets has also generated incremental demand, leading to a steady expansion of the product's market size. However, medical-grade calcium sulfate dihydrate must meet strict pharmacopoeial standards, placing extremely high demands on impurity control, batch consistency, and production cleanliness. As a high-purity inorganic excipient that meets pharmacopoeial standards, medical-grade calcium sulfate dihydrate is often used as a diluent, filler, and disintegrant in tablets and capsules, improving the tableting performance and stability of drugs while maintaining consistent efficacy.

The global Medical Grade Calcium Sulfate Dihydrate market size was estimated at USD
