Report Overview

Medical grade coatings range from lubrication and anti-microbial liquids to water-resistant polymer. Each type of medical grade coatings are used on medical devices for many applications. Many types of medical grade coatings are used on medical devices such as lubricants, hydrophilic, hydrophobic, anti-microbial, and drug-eluting, among others. Lubricant coatings are used on medical devices that require extra assistance in besting inserted into the biological opening or other medical devices. Hydrophilic surface coatings are used on many medical devices such as tubes, as these require more wettability in order to properly function with body tissues and fluids. Antimicrobial coatings are used on medical devices that come in contact with sensitive bodily fluids such as blood or urine. These devices need to be sanitized with antimicrobial coatings to prevent the infection from external bacteria spreading into the body.
