## Abstracts

Medical grade PEEK resin refers to PEEK resin that meets the relevant regulations and standards for medical devices and can be used to manufacture medical devices and their components. Medical grade PEEK Shape Products refer to products of various shapes made of medical grade PEEK resin through extrusion, injection molding and other processes, such as rods, plates, pipes, films, etc. Medical grade PEEK Shape Products can be used directly for processing medical devices or as raw materials for further processing. Compared with ordinary PEEK, medical grade PEEK has more stringent requirements in terms of biocompatibility, chemical stability, traceability, etc.

**Market Development Overview:**As a high-performance biomaterial, Medical Grade PEEK Resin and Shape Products are widely used in the field of medical devices due to their excellent biocompatibility, mechanical properties and processing properties. In recent years, with the aging of the global population and the continuous improvement of medical standards, market demand has continued to grow and the market size has continued to expand.

**Regional Analysis:**The global market is mainly distributed in North America, Europe, Asia Pacific and other regions. Among them, the North American and European markets are relatively mature, with stable demand growth, mainly driven by the widespread application of orthopedic implants and dental materials. In the Asia-Pacific region, especially China, the medical grade PEEK market has grown rapidly in recent years, mainly due to the rapid improvement of medical standards and the intensification of the aging trend of the population. It is expected to become the world's largest consumer market in the future.

**Price Analysis:**The price of medical grade PEEK is affected by factors such as raw material costs, production processes, certification fees, and market demand, and is generally at a high level. The prices of medical grade PEEK of different types and specifications vary greatly. For example, the price of PEEK for orthopedic implants is much higher than that of PEEK for ordinary medical devices.

In the future, with the advancement of production technology and the intensification of market competition, prices are expected to gradually decline, thereby further expanding its application scope. Market competition analysis: The global medical-grade PEEK resin and profile market is mainly monopolized by several international giants, such as Victrex in the UK, Solvay in Belgium, and Evonik in Germany. These companies have advanced production technology and a complete sales network, and they dominate the market. In recent years, Chinese local companies have also begun to get involved in the field of medical-grade PEEK and have made some progress, but compared with international giants, there is still a large gap in technology level and market share. Market development opportunities and risks: The aging of the population is intensifying. The medical level is constantly improving. Policy support is increasing. Risk of raw material price fluctuations. High technical barriers. Fierce market competition. Strict regulatory supervision. Latest developments: In recent years, the global medical-grade PEEK resin and profile industry has seen frequent investment and merger activities, and major companies have increased their investment and expanded production capacity to seize market share. In 2023, Victrex of the UK announced an investment of 100 million pounds to expand the PEEK resin production capacity of its UK plant, including medical-grade PEEK resin. In 2022, Solvay of Belgium acquired the PEEK business of Gharda Chemicals of India, further expanding its influence in the Asian market. In 2021, Jilin Zhongyan Polymer Materials Co., Ltd. of China invested in the construction of a 1,000-ton annual PEEK resin project, including medical-grade PEEK resin.

The global Medical Grade PEEK Resin and Shape Products market size was estimated at USD 506.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 9.00% during the forecast period.
