Abstracts

Oral Nutritional Supplements (ONS) are sterile liquids, semi-solids or powders, which provide macro and micro nutrients. They are widely used within the acute and community health settings for individuals who are unable to meet their nutritional requirements through oral diet alone. ONS use must be approved by the Advisory Committee on Borderline Substances (ACBS). A significant driver in the medical oral nutrition supplements market is the increasing awareness of the importance of nutrition in healthcare and the rising incidence of malnutrition, chronic diseases, and aging populations. Medical oral nutrition supplements provide essential nutrients for individuals who may have difficulty maintaining adequate nutrition through regular diets. However, a notable challenge in this market is the need for customization and adherence.
