### Report Overview:

The medical oxygen concentration should be above 99.5% according to the regulations, based on the following three considerations: First, in emergency state, high-purity oxygen can be used to save the patient's life; second, high-concentration oxygen can be diluted as needed for clinical use. The required oxygen concentration is used for treatment; the third is that the higher the concentration, the smaller the amount of magazine in the gas, and the safer it is for the patient.
