Report Overview:

Medical-grade power supplies have been specially designed to meet the IEC60601 medical equipment safety standard. IEC60601-rated power supplies must have effective and reliable isolation between the AC input to the power supply, the internal high voltage stages, and the DC output. Any shortcoming in isolation risks electric shock. Spacing between conductors and electronic components must be sufficient in order to meet the isolation standards and qualify the power supply for global medical certifications. In addition, medical power supplies use double or reinforced insulation and must adhere to stringent leakage requirements.
