### Report Overview

Privacy screens and curtain have many different uses. These screens can be used to share the space in a room by creating partitions or sub sections. Privacy screens are foldable screens that are free standing and are composed of hinged panels with casters for easy transportation. They are generally composed of three or more panels. For smaller spaces two panel screens are more appropriate. When the panels unfold they isolate one part of the room from another. These screens are mostly used when two or more patients are sharing the room. Find here privacy screens and curtains for use in hospital and long term care facilities at best prices and attractive discounts.
