Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Medical Silicone Adhesive competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global Medical silicone adhesive sales reached approximately 6700 tons, with an average global market price of around 74 K USD/Ton. Medical silicone adhesive is a high-performance silicone material specifically formulated for healthcare applications, characterized by its excellent biocompatibility, hypoallergenic properties, and breathability. It is primarily used to securely yet gently adhere medical devices (such as wound dressings, ostomy bags, glucose monitoring sensors, and transdermal electrodes) to the skin. This adhesive can withstand sterilization and maintains stable adhesion under varying moisture conditions, thereby minimizing irritation to sensitive or compromised skin, even during prolonged wear. The medical silicone adhesive industry is advancing into a new phase of development driven by innovative applications and regulatory compliance. Its core value proposition is evolving from providing basic adhesion to meeting higher demands for biocompatibility, wearing comfort, and device integration. Future competition will center on material innovation, such as developing more breathable, sweat-resistant, and low-residue formulations to support the proliferation of long-term wearable medical devices. However, the industry continues to face challenges, including navigating increasingly complex global medical device regulations, balancing high performance with cost control, and ensuring supply chain reliability and material traceability. These factors will collectively shape the competitive landscape and market share distribution.

The global Medical Silicone Adhesive market size was estimated at USD 503.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.60%

during the forecast period.
