Medicine decoction machines are automated devices designed to simplify and standardize the process of preparing traditional herbal decoctions, which involve boiling, simmering, and concentrating medicinal herbs to extract their active compounds. These machines typically feature programmable settings for temperature, duration, and liquid volume, ensuring consistency, accuracy, and convenience while reducing the need for manual oversight. They cater to both clinical settings, such as traditional Chinese medicine pharmacies and hospitals, and home users seeking to integrate herbal remedies into their wellness routines.
