Abstracts

Medium yarn refers to cotton yarn with an English count of 19-28. The count is an index to measure the thickness of cotton yarn. The higher the count, the finer the yarn. Medium yarn is characterized by its moderate thickness and wide range of uses. It can be used to weave various fabrics. Medium yarn is often used to weave plain weave, twill, satin and other common fabrics, which are widely used in clothing, home textiles and other fields. Due to its good performance and moderate price, medium yarn occupies an important position in the textile industry. At present, the medium yarn industry is facing some challenges and opportunities. On the one hand, market competition is increasingly fierce, and enterprises need to continuously improve product quality and reduce costs to gain a foothold in the market.
