Report Overview

Membrane Bioreactor (MBR) is a biochemical reaction system that integrates membrane separation technology and bioreactor biodegradation. The largest MBR market is in China, and the following MBR membrane market is also in China. With the popularization of MBR membrane technology and the decrease of raw material cost, the price of MBR membrane will eventually decrease, and the overall trend in the future is still downward. Due to China and that global water demand driven, membrane treatment (MBR process) will put sewage into a new era, and further drive the MBR membrane high speed increasing, but because of falling prices, profits era, to regular profit era, but better than components and profit margins of membrane bioreactor; The situation of MBR membrane demand is about to start. However, with the rapid increase of production capacity, China will be in a state of supply and demand balance after 5 years. Hollow fiber structure MBR membrane will become the mainstream of future development. The MBR production process will be transformed to thermally induced phase separation technology, which will lead to a new round of cost reduction. With the decrease of PVDF cost, the raw material will cost MBR the most ideal raw material. Due to the trend of MBR process, MBR membrane investment will be hot, if the total cost of MBR process is further reduced, MBR membrane market still has a huge development space; MBR membrane raw materials gradually from long orders to bulk market sales, because MBR membrane will enter the surplus period, the price of raw materials will soon enter the vicious competition pattern; Although MBR membrane production projects are very hot, but there is no technical and financial strength of enterprises to enter the MBR membrane market still need to be cautious.

Global Membrane Bioreactor (MBR) key players include SUEZ, Evoqua, AsahiKasei, KUBOTA, etc.
