## Abstracts

Merchant of Record (MoR) software refers to a type of platform that handles the financial and legal responsibilities associated with processing customer transactions for businesses, particularly in e-commerce. When a company uses MoR software, the provider takes on the role of the merchant of record, which means they manage payment processing, compliance, tax collection, chargebacks, and refunds. The merchant software market is experiencing rapid growth, primarily driven by the increasing globalization of e-commerce, cross-border payment compliance, and the need to simplify consumer settlements. MoR, as a third-party settlement and compliance platform, helps merchants handle core functions such as payments, taxation, financial compliance, and risk control, lowering the barriers and compliance costs of cross-border transactions. Market trends include seamless, integrated Payment as a Service (PaaS) solutions, automated tax and invoicing compliance, cross-border RMB/USD and other multi-currency settlements, and deep support for digital wallets, subscription-based business models, and multi-channel sales. Meanwhile, security, KYC/AML compliance, data privacy protection, and seamless integration with merchant platforms (such as e-commerce and marketplaces) are becoming key competitive advantages. Vendors are increasing their market share through global payment networks, flexible pricing, and rapid deployment capabilities.

The global Merchant of Record Software market size was estimated at USD 317.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.40% during the forecast period.
