Abstracts

Meta-aramid fiber, namely poly(m-phenylene isophthalamide) (PMTA), is also known as aramid 1313. Meta-aramid fiber is the fastest growing seed in organic high-temperature resistant fiber. The fiber molecule is composed of meta-phenylene groups connected to each other by amide groups, and the molecular chain is linear and serrated. Due to the strong hydrogen bonding between molecules, the fiber has excellent flame retardancy, thermal stability, radiation resistance and other properties. There are high technical and capital barriers in the meta-aramid industry. In the global market, the meta-aramid market has a high degree of concentration. The leading companies mainly include DuPont, Teijin, Yantai Tayho Advanced Materials, and X-FIPER New Material. Among them, DuPont and Teijin were the first to realize the industrial production of meta-aramid. With technology, quality and first-mover advantages, DuPont and Teijin occupy a dominant position in the international market. Yantai Tayho Advanced Materials is the leading company in the Chinese meta-aramid market. It realized the industrial production of meta-aramid around 2005. Meta-aramid has excellent comprehensive performance and a wide range of downstream applications. In the future, with the advancement of related technologies and the penetration of low-end products into high-end fields, the meta-aramid market has great development potential. With the increasing attention paid to safety and environmental protection around the world, the demand for meta-aramid in the fields of industrial environmental protection, personal safety protection, etc. is growing rapidly. With the continuous improvement of laws and regulations and the deepening of the leading role of mandatory standards for personal protection, the cooperation of the protective clothing industry chain is becoming more and more perfect, and personal protection fields such as petrochemicals will usher in development opportunities. Global key manufacturers of Meta Aramid include Dupont, Yantai Tayho Advanced Materials, Teijin, X-FIPER New Material etc. The top 1 player hold a market share of 55%. The Meta Aramid are mainly produced in China and North

America, these regions are dominating the global market, hold a market share about 60 percent. In terms of application, the largest application is electrical insulation, followed by protective clothing.
