Meta Universe NFTs are blockchain-based digital assets characterized by uniqueness, immutability, and traceability, granting clear ownership and value within virtual worlds. They represent ownership of virtual items, digital collectibles, or virtual real estate, and can be traded across metaverse platforms, forming a critical foundation for the digital economy and virtual social ecosystems. In 2024, the average industry gross margin was about 40%. From a regional perspective, North America is the largest market, accounting for 34% of the total global market; followed by Europe, with 30% of the total market. Asia governments generally restrict virtual assets and cryptocurrencies to guard against financial risks, which limits the scale of the NFT market to a certain extent.
