## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Metal Core Welding Wire competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global sales of metal core welding wire reached 450,000 tons, with an average selling price of US\$2,100 per ton and a CAGR of 4.5%. Metal core welding wire mainly consists of welding metal (such as steel or copper wire) and an outer coating of metal powder or alloy. Upstream raw materials primarily include steel, copper, and aluminum alloys, with procurement prices affected by fluctuations in global mineral resource prices. Major suppliers include globally renowned steel producers and alloy suppliers. Downstream applications are wide-ranging, primarily in the construction, automotive, shipbuilding, energy, and machinery manufacturing industries. Demand for metal-cored welding wire is concentrated in the industrial and heavy manufacturing sectors, and market demand is showing an upward trend with infrastructure construction and industrial upgrading. The total production capacity is approximately 1.8 million tons per year, with a gross profit margin of 22%. Among downstream consumption, the construction and automotive industries account for the highest proportions, at 45% and 30%, respectively. In terms of upstream material consumption, steel and copper are the main consumables, accounting for over 70%. Looking ahead, with the advancement of intelligent manufacturing and efficient welding technologies, demand for metal-cored welding wire is expected to continue to grow, especially in high-end manufacturing and the automotive industry. Enterprises need to focus on developing new high-performance welding materials to meet increasingly stringent welding quality requirements. Meanwhile, with increasingly stringent global environmental policies, green welding technologies and sustainable development will become key competitive opportunities in the future.

The global Metal Core Welding Wire market size was estimated at USD 946.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.50% during the forecast period.
