Abstracts

Metal rivet nuts are used in the fastening field of various metal plates, pipes and other manufacturing industries, and are widely used in the assembly of electromechanical and light industrial products such as automobiles, aviation, railways, refrigeration, elevators, switches, instruments, furniture, decoration, etc. They are developed to solve the shortcomings of easy melting of welding nuts on metal sheets and thin tubes, easy deformation of base materials during welding, and easy slipping of tapping internal threads. It does not require tapping internal threads, does not require welding nuts, has strong riveting efficiency, and is easy to use.
