The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Metal Skirting competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Metal skirting is a decorative strip installed at the junction of walls and floors. It is made of metals such as aluminum alloy and stainless steel. It is wear-resistant, impact-resistant, moisture-resistant, and fire-resistant. Its built-in clip-on structure and cable duct design allow for quick installation and concealed wiring. Its anodized or spray-coated surface protects the base of the wall while enhancing the modern feel of the space. In 2024, the global metal skirting market price was US\$6 per meter, with sales of approximately 237,000 kilometers and an average annual production capacity of approximately 150,000 to 250,000 meters per line. The industry profit margin was 15% to 25%. Upstream: aluminum/stainless steel coils, surface treatment agents (powder coatings, anodizing electrolytes), and plastic accessories (clip-ons and end caps). Downstream: residential renovation, commercial and public renovation, building materials retailers, and existing home renovation projects.

The global Metal Skirting market size was estimated at USD 1422.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.70% during the forecast period.
