## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Metal-to-metal Butterfly Valve competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global sales of metal-to-metal butterfly valves reached 1.15 million units, with an average selling price of \$720 per unit. Metal-to-metal butterfly valves are high-performance industrial valves with metal sealing surfaces for both the seat and disc. They offer high-temperature, high-pressure, wear-resistant, corrosion-resistant, and zero-leakage properties, making them widely used in the petrochemical, power generation, metallurgy, papermaking, and natural gas transmission industries. Upstream raw materials include stainless steel, alloy steel, sealing alloys, valve stem materials, and sealing ring materials. Major suppliers include Baosteel, Ansteel, Special Metals, SMC, and Hailiang Group. Downstream customers include Sinopec, CNOOC, BASF, State Power Investment Corporation, and metallurgical equipment integrators. Global production capacity is approximately 1.2 million units, with an average industry gross profit margin of approximately 26%. Downstream consumption is driven by the petrochemical and energy industries, approximately 50%, the power generation and metallurgy industries, approximately 30%, and the papermaking and environmental protection industries, approximately 20%. Upstream raw material costs account for approximately 61% of total manufacturing costs. Future development directions will focus on the application of high-temperature and high-pressure corrosion-resistant alloys, fully automatic control, sealing material upgrades and intelligent working condition feedback butterfly valve technology.

The global Metal-to-metal Butterfly Valve market size was estimated at USD 828.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of
