Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Micro Piezo Inkjet Printheads competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Micro Piezo inkjet printheads are non-thermal inkjet devices that use piezoelectric actuators to eject ink droplets with high precision. When an electrical charge is applied, the piezoelectric material physically deforms, generating a pressure pulse that forces a droplet of ink through a nozzle and onto the print surface.
