Abstracts

Microalgae oil supplements are nutritional products derived from microalgae strains such as *Schizochytrium* sp. and *Cryptocodinium cohnii*, which are cultivated to produce oils rich in docosahexaenoic acid (DHA) and eicosapentaenoic acid (EPA)?omega-3 fatty acids traditionally sourced from fish oil. These supplements are marketed as a sustainable, plant-based alternative for supporting cardiovascular, cognitive, and ocular health, appealing to vegetarians, vegans, and environmentally conscious consumers seeking to avoid potential contaminants or overfishing concerns associated with marine-derived omega-3s.
