## Abstracts

Microcapsule Composite Coated Fasteners are used to solve vibration loosening problems on Bolts, nuts and other threaded fasteners, as well as leakage problems by applying sealants under the head of Screws and Bolts, replacing O Rings and/or gaskets and rubber washer. The pre-applied threadlocker of Microcapsule Composite Coated Fasteners remains inactive until the coated fastener is assembled onto the mating part. During the assembly the micro capsules are ruptured, initiating the polymerization process, curing the assembly quickly at room temperature, providing reliable locking and immediate sealing properties to the assembly.

The global Microcapsule Composite Coated Fasteners market size was estimated at USD 816.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 8.40% during the forecast period.
