Micro-needling is a safe, minimally effective therapeutic procedure which is associated with chemical, laser or IPL treatments for treating the skin. The micro-needling process is also known as collagen induction therapy. The Microneeding treatment involves rolling a small device which is covered by hundreds of tiny needles over a skin. These tiny needles penetrate in the skin which triggered the body response, causing an increase in the production of collagen and elastin. Micro-needling devices are basically used to lift, tighten, and rejuvenate the skin of all ages. Micro-needling is a trendy cosmetic procedure which can use for a very wide range of indications.
