Abstracts

Microtunnel Machine, also called tunnel boring machine (TBM) is a machine used to excavate tunnels with a circular cross section through a variety of soil and rock strata. They may also be used for micro tunneling. The Microtunnel Machine market is dominated by a few major players, with Herrenknecht, Vermeer and Akkerman being the core players in the industry, accounting for about 30% of the global market share. These companies are known for their technological innovation and efficient production capabilities, and offer a wide range of tunnel boring equipment suitable for complex underground infrastructure projects. At the same time, the market concentration is moderate, and small and medium-sized enterprises in other regions and countries are also participating in the competition in this field, especially in the Asia-Pacific region. In terms of regional distribution, the Asia-Pacific region is the world's largest Microtunnel Machine market, accounting for about 67% of the market share. The increasing demand for underground pipeline systems in China, India and Southeast Asian countries during urbanization has driven market growth in this region. This is followed by Europe and North America, accounting for 13% and 11% respectively. The market maturity in these regions is relatively high, mainly driven by infrastructure maintenance and modernization, but emerging markets such as the Middle East and Africa also show potential. In terms of future development trends, with the global emphasis on environmental protection and infrastructure construction, the Microtunnel Machine market will continue to grow. The accelerated urbanization process and the increasing demand for underground projects such as drainage and cable pipelines will bring new opportunities to the industry. However, the industry also faces challenges, such as high equipment costs, technical barriers and intensified competition. In the future, manufacturers need to strengthen technological innovation, especially in green construction and digital control, to meet stricter environmental regulations and market demands.

The global Microtunnel Machine market size was estimated at USD 591.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 9.30% during the forecast period.
