Report Overview

Mil-dot reticle tactical scopes have all the features needed in a high-quality tactical scope. These scopes are considered as the final evolution step of the classic optical riflescopes for tactical use. The common goal of all tactical scopes is to hit the target with the first shot and to make compensation for bullet drop and wind drift as accurate and straightforward as possible. With a Mil scope, this goal can be achieved even easier. The name itself shows that these scopes have reticles that have subtensions divided in milliradians at all magnification settings and that their clicks matched with reticle subtensions and thus also in milliradians.
