## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Mineral Oil-based Grease competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, the global production of mineral oil-based greases reached 1,447.97 tons, with an average selling price of US\$37.19 per kilogram. Mineral oil-based grease is a semi-solid or solid lubricant made from mineral oil as the base oil, with the addition of thickeners (such as lithium soap, calcium soap, aluminum soap, and other metal soaps or complex soaps) and additives such as antioxidants, rust inhibitors, and extreme pressure anti-wear agents. Mineral oil accounts for 70%-95% of the total grease volume and is mainly a mixture of hydrocarbons (such as naphthenic and paraffinic oils) obtained from crude oil through distillation, refining, and dewaxing processes, containing alkanes, cycloalkanes, aromatics, and small amounts of non-hydrocarbon compounds. The gross profit margin for mineral oil-based greases was 17.73%, with a gross profit of US\$6.59. Single-line production capacity was 55-65 tons per year. The upstream of mineral oil-based grease involves the supply of raw materials (base mineral oil, lithium/calcium soap thickener, antioxidants, and rust inhibitors), represented by base oil suppliers such as Shell, ExxonMobil, and Chevron, and additive and thickener manufacturers such as Lubrizol, BASF, and AkzoNobel. Downstream applications include automotive manufacturing (engine, chassis lubrication), industrial machinery (bearings, gearboxes), construction equipment (excavators, cranes), power equipment (transformer cooling), and household appliances (motor bearings), involving end users such as Volkswagen, Toyota, Siemens, Sany Heavy Industry, and Haier.

The global Mineral Oil-based Grease market size was estimated at USD 53.85 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.40%

during the forecast period.
