The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Mini LED Automotive Backlight Display Module competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, the global production of Mini LED automotive backlight display modules will reach 6.75 million units, with an average selling price of US\$700 per unit. Mini LED automotive backlight display modules are a new display technology solution for automotive central control screens, instrument clusters, passenger entertainment screens, and rear-seat displays. Their core technology utilizes a large number of tiny Mini LED chips as backlight sources, utilizing local dimming to achieve higher contrast, a wider color gamut, lower power consumption, and a longer lifespan. Compared to traditional LCD backlight solutions, Mini LEDs offer higher brightness and more uniform display quality in strong sunlight and complex environments, meeting stringent automotive requirements for high reliability, high and low temperature resistance, vibration resistance, and long lifespan. Furthermore, they support custom-shaped cutting and curved designs, aligning with the growing trend toward multi-screen and personalized displays in vehicles. With the increasing demand for smart cockpits, in-car entertainment, and autonomous driving information displays, Mini LED backlight modules are becoming a key component of high-end automotive displays. Numerous domestic and international manufacturers are accelerating their development efforts, aiming to establish Mini LEDs as a mainstream technology for next-generation automotive displays. The core component of Mini LED automotive backlight display modules is automotive-grade Mini-LED chips, supplied by companies such as Nichia, Seoul Semiconductor, Ams Osram, and Refond. These chips are used by automakers such as Tesla, General Motors, Volkswagen, and Li Auto.

The global Mini LED Automotive Backlight Display Module market size was estimated at USD 4725.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 3.60% during the forecast period.
