Abstracts

Mobile commerce (M-commerce) refers to the buying and selling of goods and services through wireless handheld devices such as smartphones and tablets, typically facilitated via mobile-optimized websites, dedicated apps, or SMS-based transactions. It encompasses a wide range of activities, including online shopping, in-app purchases, mobile banking, digital payments, and location-based services, all designed to provide users with convenience, personalization, and real-time accessibility. Unlike traditional e-commerce, which relies on desktop or laptop computers, M-commerce leverages the portability, connectivity, and integrated features?such as cameras, GPS, and touchscreens?of mobile devices to enable seamless, on-the-go transactions and enhanced customer engagement.

The global Mobile Commerce (M Commerce) market size was estimated at USD 4200000.0 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 18.50% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Mobile Commerce (M Commerce) market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights. It examines market size, competitive landscape, emerging development trends, niche segments, key drivers and challenges, as well as conducts SWOT and value chain analyses.

The insights provided enable readers to understand the competitive dynamics within the industry and formulate effective strategies to enhance profitability and market positioning. Additionally, the report presents a clear framework for evaluating the current status and future outlook of business organizations operating in this sector.
