Abstracts

Modified tapioca starch refers to tapioca starch that has been chemically, physically, or enzymatically altered to enhance its functional properties, such as improved stability, texture, solubility, or resistance to heat, acid, or shear. These modifications make it suitable for a wide range of industrial applications beyond its native form, including use as a thickener, stabilizer, binder, or texturizer in food and beverage, pharmaceutical, paper, textile, and adhesive industries. The modifications are tailored to meet specific performance requirements, allowing for customization based on end-use needs, and they often involve processes like cross-linking, substitution, oxidation, or pre-gelatinization to achieve desired characteristics like increased viscosity, clarity, or freeze-thaw stability.
