Abstracts

Moisture-proof board is to add a certain proportion of moisture-proof particles in the production process of the base material, also known as melamine board (base material), which can greatly reduce the degree of expansion of the board when exposed to water. Moisture-proof boards originated in Europe. The global chemical industry is part of the global economic development, and the cyclical economic development envelopes the global chemical industry. In recent years, global economic growth has slowed down, and the growth rate of the chemical industry has also gradually slowed down. The development of emerging economies such as China and India has continued to promote the global chemical industry to maintain a certain development trend in the past few years. In the future, these economies will continue to drive the chemical industry market forward with their large population base and strong domestic demand growth. In addition to the influence of the geopolitical characteristics of the Middle East, the shale gas industry in the United States among developed countries has become the biggest variable in recent years, driving the strong development of the U.S. chemical industry.

The global Moisture-proof Ceiling Gypsum Board market size was estimated at USD 1214.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.50% during the forecast period.
