### Report Overview

Monobloc Air Source Heat Pump like a combi boiler and is literally a 'single block' system, where the heat pump has all of its components (apart from the hot water cylinder which is installed in the home) located inside a heat pump unit situated outside the home.

When used in outdoor climates with peak winter temperatures below 0°C (32°F), a Propylene Glycol/Water Mixture shall be used as a heat transfer fluid to avoid freezing. Mixture Glycol Concentration % depends on lowest winter temperature.
