Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Montelukast Sodium competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Montelukast sodium is a hygroscopic, optically active, and white to off-white powder. Montelukast sodium is freely soluble in ethanol, methanol, and water and practically insoluble in acetonitrile. It is administered orally for prophylaxis and chronic treatment of asthma, exercise-induced bronchoconstriction, and allergic rhinitis. The Montelukast Sodium market is experiencing significant growth, driven by the increasing global prevalence of respiratory conditions such as asthma and allergic rhinitis. As a leukotriene receptor antagonist, Montelukast Sodium effectively reduces inflammation and bronchoconstriction, making it a preferred treatment option. The market's expansion is further supported by the rising geriatric population, heightened awareness of respiratory health, and the affordability of generic alternatives following patent expirations. Additionally, the development of combination therapies and advancements in drug formulations are enhancing treatment efficacy and patient compliance. The COVID-19 pandemic also underscored the importance of respiratory medications, with studies suggesting Montelukast's potential in mitigating certain viral effects, thereby boosting its demand. Regionally, North America holds a substantial share of the Montelukast Sodium market, attributed to its advanced healthcare infrastructure and high incidence of asthma. However, the Asia-Pacific region is projected to witness the fastest growth, fueled by increasing healthcare investments, urbanization, and a growing patient population. Despite the positive outlook, the market faces challenges such as pricing pressures from generic competition, potential side effects, and the emergence of alternative therapies. Nonetheless, ongoing research and development, coupled with strategic collaborations among pharmaceutical companies, are expected

to sustain the market's upward trajectory.

The global Montelukast Sodium market size was estimated at USD 438.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 13.00% during the forecast period.
