## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Motorcycle Brake Hose competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global sales of motorcycle brake hoses reached 132 million units, with an average selling price of US\$3.8 per unit. Motorcycle brake hoses are high-pressure transmission lines used to connect the brake master cylinder and caliper, primarily responsible for hydraulic oil transmission and brake pressure transmission. They require excellent pressure resistance, corrosion resistance, and high-temperature resistance. The product generally consists of an inner layer of synthetic rubber, a reinforcing layer (high-strength polyester fiber or stainless steel braided mesh), and an outer protective rubber layer, with a rated working pressure between 10-25 MPa. Upstream raw materials include synthetic rubber (EPDM, NBR), stainless steel wire, nylon, and polyester fiber, with major suppliers including Hanwha Chemical, JSR, Baosteel Stainless Steel, and DuPont. Downstream customers are motorcycle OEMs and braking system suppliers, such as Honda, Yamaha, Kawasaki, Zongshen, Brembo, and Nissin Brakes. Global total production capacity is approximately 150 million units, with an industry average gross profit margin of approximately 21%. Of the upstream materials, rubber accounts for 45% of the cost, steel wire and reinforcing materials account for 35%, and coatings and connector components account for 20%. In the downstream application structure, OEM (Original Equipment Manufacturer) components account for approximately 65%, and the aftermarket accounts for approximately 35%. Future development focuses on the integration of lightweight composite material hoses, environmentally friendly lead-free connectors, and intelligent pressure monitoring systems.

The global Motorcycle Brake Hose market size was estimated at USD 502.0 million in

2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.60% during the forecast period.
