## Abstracts

The Mullen Bursting Strength Tester is a machine used to measure the bursting strength of materials like paper, cardboard, textiles, and corrugated board. It applies hydraulic pressure to a circular area of the material until it ruptures. The maximum pressure recorded at the point of rupture is the bursting strength, measured in kilopascals (kPa) or pounds per square inch (psi). This test is crucial for determining the material's resistance to rupture under pressure, ensuring product quality and integrity in packaging and manufacturing. The industry trend for Mullen Bursting Strength Testers is moving towards increased automation, digitalization, and integration with Industry 4.0 standards. Modern testers are incorporating advanced sensors, software, and data analysis capabilities to provide more accurate and real-time results. There's a growing demand for testers that can seamlessly integrate with production lines and quality control systems, allowing for automated testing and data logging. The focus is on improving efficiency, reducing human error, and enhancing traceability. Furthermore, there's a trend towards developing more versatile testers that can handle a wider range of materials and test parameters. Predictive maintenance and remote monitoring capabilities are also becoming increasingly important, enabling manufacturers to proactively address potential issues and minimize downtime. Sustainability is another key factor, with manufacturers seeking testers that are energy-efficient and use environmentally friendly materials. The integration of artificial intelligence and machine learning is also emerging, allowing for more sophisticated data analysis and predictive quality control. Overall, the industry is driven by the need for faster, more accurate, and more reliable testing solutions that can meet the demands of modern manufacturing and quality assurance.

The global Mullen Bursting Strength Tester market size was estimated at USD 218.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of
