Report Overview

Multi-Axis Positioner is essential for test, metrology, and manufacturing in many high-tech industries. PI designs and manufactures multi-axis positioners based on 3-phase linear motors, torque motors, piezo motors, voice-coil motors, servo and stepper stages in both serial-kinematics and parallel kinematics (Stewart platform) configurations. Serial kinematics multi-axis positioners consist of a combination of individual linear slides, XY-stages, rotary tables, and goniometric stages, while parallel kinematics positioners are integrated and cannot be separated into individual axes.
