Abstracts

Multi-laser SLM System is a SLM 3D printer with multiple lasers. SLM (selective laser melting) is one of the laser powder bed fusion technologies. It is a laser-based 3D printing technology in which metallic powder materials are selectively melted layer by layer to produce 3D objects. Since the build space is filled with an inert, i.e. inert, shielding gas such as nitrogen or argon, the metal runs little risk of oxidizing, which would render the printed components unusable.

The global Multi Laser Slm System market size was estimated at USD 125.6 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 10.80% during the forecast period.

This report offers a comprehensive and in-depth analysis of the global Multi Laser Slm System market, covering all critical facets from a broad macroeconomic overview to detailed micro-level insights.
