Report Overview

Multi-laser SLM System is a SLM 3D printer with multiple lasers. SLM (selective laser melting) is one of the laser powder bed fusion technologies. It is a laser-based 3D printing technology in which metallic powder materials are selectively melted layer by layer to produce 3D objects. Since the build space is filled with an inert, i.e. inert, shielding gas such as nitrogen or argon, the metal runs little risk of oxidizing, which would render the printed components unusable.
