Abstracts

Multi-parameter water test strips are tools designed to analyze multiple water quality parameters simultaneously. These strips typically consist of individual test pads or reagent-impregnated sections, each dedicated to measuring a specific parameter. Users can dip the strip into a water sample, and the different sections will change color based on the concentrations of various chemicals or ions present. Users can then compare the color changes to a provided color chart to determine the levels of different parameters.

The global Multi-Parameter Water Test Strip market size was estimated at USD 109.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 6.40% during the forecast period.
