## Abstracts

The multi-port micro coaxial connector is a miniaturized, multi-channel coaxial connector for transmitting high-frequency signals. It combines the electrical performance advantages of coaxial connectors (such as low loss and high shielding effectiveness) with the convenience of multi-port design, and can achieve independent transmission of multiple signal channels in a limited space. The main difference between the multi-port micro coaxial connector and the ordinary multi-port coaxial connector is that the multi-port micro coaxial connector integrates more ports in the same area by reducing the size of a single channel, which is suitable for space-sensitive applications (such as drone-mounted equipment).

The global Multi-port Micro Coaxial Connector market size was estimated at USD 532.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 5.80% during the forecast period.
