Abstracts

Cosmetic antimicrobial agents are ingredients that help to prevent the growth of unwanted microorganisms in skin care products and enhance product preservation. These microorganisms may include bacteria, viruses, or fungi. Antimicrobial products, also known as antibacterial products, offer customers that extra measure of protection against potentially harmful bacteria, ensuring that the cosmetics will be free from microorganisms on the shelf and once they are opened. The total size of the global beauty industry in 2022 was about US\$ 427 billion, with the sales of skin care products was about US\$ 190 billion, perfumes US\$ 70 billion, color cosmetics US\$ 80 billion, hair care products US\$ 90 billion. Head beauty and personal care companies are concentrated in Europe and the United States. More than one-third of the top 100 companies are headquartered in the United States, and 22.9% of the companies are located in France. As the beauty industry evolves, multifunctional cosmetic antimicrobial agents have emerged as a hot trend in the market. These antimicrobial agents not only extend the shelf life of cosmetics but also provide protection to users against bacteria and viruses. Especially in the backdrop of the ongoing global health crisis, there is a heightened demand for hygiene and safety in personal care products. Consequently, the demand for multifunctional cosmetic antimicrobial agents is rapidly increasing. These antimicrobial agents can be used not only in various cosmetics such as foundations, lipsticks, and eyeshadows but also in skincare and personal care products like shampoos and soaps. In the market, an increasing number of brands are launching products that incorporate antimicrobial agent ingredients to meet consumer demands, which will contribute to further growth in the cosmetics industry.

The global Multifunctional Cosmetic Antimicrobial Agents market size was estimated at USD 540.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 4.10% during the forecast period.
