Abstracts

A multispace parking meter is a centralized electronic payment system that manages multiple parking spaces within a designated area, replacing individual single-space meters with a single kiosk or terminal where users pay for parking and receive a printed or digital receipt to display in their vehicle. These systems often incorporate advanced features such as credit/debit card processing, mobile payment integration, real-time occupancy monitoring, dynamic pricing capabilities, and remote data management, allowing municipalities and private operators to streamline enforcement, optimize revenue collection, and enhance user convenience while reducing maintenance costs associated with traditional meter infrastructure.
