Abstracts

Music notation software refers to specialized computer applications designed for the creation, editing, arrangement, and publication of sheet music, enabling composers, arrangers, educators, and musicians to produce professional-quality scores through digital interfaces. These programs typically feature tools for inputting notes via MIDI keyboards, computer keyboards, or mouse, alongside advanced functionalities such as playback, transposition, part extraction, and integration with digital audio workstations (DAWs). Unlike general music production software, notation programs prioritize visual accuracy and adherence to traditional engraving standards, supporting a wide range of musical symbols, dynamics, and formatting options to meet the needs of both classical and contemporary music contexts.
