## Abstracts

Myopia, also called near-sightedness or short-sightedness, is a problem with the focusing ability of the eye. It is when the eye is not able to focus properly on objects in the distance. In this study, Orthokeratology Lens was focused. The myopia control lens industry is continuously evolving to address the increasing prevalence of myopia and the growing demand for effective solutions. Several solutions and innovations are being developed and implemented to tackle the challenge of myopia progression.

Orthokeratology (Ortho-K): Orthokeratology is a non-surgical method of myopia control that involves wearing specially designed gas-permeable contact lenses overnight. These lenses reshape the cornea temporarily, providing clear vision during the day without the need for glasses or contact lenses. Ortho-K lenses are particularly popular among children and teenagers as they offer a convenient and reversible option for myopia management. Soft contact lenses offer an alternative option to spectacles for correcting vision. They are made from a flexible clear oxygen permeable material and fit to closely align with the front surface of the eye. Not all of these myopia control soft contact lenses are available in all countries or eye care practices. A further consideration is local regulatory approvals - in the USA for example contact lenses are approved for use by the Federal Drugs and Administration (FDA). Myopia control contact lenses can be prescribed without FDA approval as "off-label" use, but FDA approval provides assurance that a lens has been extensively tested and approved for safety and effectiveness. Currently the CooperVision MiSight 1 day lens is the only myopia control soft contact lens to have FDA approval. Asia-Pacific is the largest consumption region of Myopia Control Lens. China is the country with the largest contribution in the Asia-Pacific region.

The global Myopia Management Contact Lens for Children market size was estimated at USD 509.0 million in 2025 and is projected to grow at a compound annual growth
