Abstracts

Myristyl dimethylamine oxide is a surfactant and foam booster derived from natural fatty acids, primarily used in personal care and household cleaning formulations due to its mildness, conditioning properties, and ability to stabilize lather; it functions as an amphoteric surfactant, meaning it carries both positive and negative charges depending on pH, which enhances compatibility with other ingredients like anionic surfactants while reducing irritation, making it particularly valued in shampoos, body washes, facial cleansers, and liquid soaps where gentle yet effective cleansing and foam longevity are desired.

The global Myristyl Dimethylamine Oxide market size was estimated at USD 54.8 million in 2024 and is projected to grow at a compound annual growth rate (CAGR) of 4.25% during the forecast period.
