Report Overview:

Melt blown extrusion is a manufacturing process that is used for creating a type of fabric called non-woven fabric, which is made from polymers such as polypropylene.

Traditional fabrics made of natural materials like cotton are woven together, meaning that the material is first formed into a yarn and then interlaced using a weaving or knitting process that results in the creation of a sheet of fabric from the yarn. N95 Grade means at least 95% against non-oily particles when tested using the NIOSH criteria.
