Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Naked Eye 3D LED Display competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. In 2024, global Naked Eye 3D LED Display reached approximately 570k square meters, with an average global market price of around US\$ 2,300 per square meter. Naked-eye 3D LED displays are an outdoor/indoor LED display technology that can present stereoscopic visual effects without wearing any glasses. Through a combination of technologies such as ultra-high resolution LED panels, irregular corner splicing, CIC (curved surface bonding), rendering engines, perspective algorithms, and multi-view content production, visual images can produce a strong spatial depth and a stereoscopic effect of "the image flying off the screen" within a specific viewing angle range. This technology often uses curved LED screens, L-shaped right-angle screens, and irregularly shaped splicing screens. Through perspective distortion correction, occlusion optimization, HDR rendering, and high frame rate playback, it achieves natural glasses-free 3D display. Naked-eye 3D LEDs are widely used in urban landmarks, commercial complexes, outdoor advertising media, large-scale event displays, and brand digital art installations, and are one of the fastest-growing LED sub-markets in recent years. The upstream of naked-eye 3D LED displays includes LED chips (SMD/IMD/COB), driver ICs, power supplies, cabinet structural components, control systems, video processors, rendering engines, and curved/right-angle splicing modules. Major suppliers include Nationstar, Hongli Zhihui, Ruifeng Optoelectronics, Jufeng Optoelectronics, Mingwei, Chenjing, Nova Control Systems, and Colorlight. The midstream consists of display system manufacturers, including Samsung, Leyard, Unilumin, Qiangli Jucai, Unilumin, and Absen, responsible for system integration, engineering installation, and calibration. Downstream applications cover commercial

advertising, outdoor media, urban landmarks (large screens), commercial complexes, cultural and tourism displays, concert stages, luxury brand flagship stores, airports, and transportation hubs. Major end customers include Wanda, Yintai, China Resources, and advertising media companies. The annual production capacity of a single-line Naked Eye 3D LED Display is approximately 8k square meters, with a gross profit margin of approximately 20%-40%.

The global Naked Eye 3D LED Display market size was estimated at USD 1314.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 13.30% during the forecast period.
