Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Nanny Cam competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Nanny Cam is a hidden camera device used to monitor children, the elderly or the home environment. It is usually installed in the home so that parents or guardians can remotely view the behavior of the nanny or caregiver. It can provide real-time video streaming, audio monitoring, motion detection and other functions to ensure the safety of family members. The growth of the nanny camera market is driven by the increase in child safety awareness, the development of smart home technology and the demand for remote monitoring. More and more families want to ensure the safety of children or the elderly at home through efficient monitoring equipment. At the same time, the popularity of smart home systems allows cameras to be more closely integrated with other devices to improve user experience. In addition, with the advancement of remote monitoring technology, consumers' demand for real-time access and intelligent analysis functions continues to increase, further promoting market expansion. However, the industry still faces challenges. Privacy and legal issues may limit the use of cameras, while network security risks may lead to data leakage and make users worry about the security of devices. In addition, as market competition intensifies, major brands continue to launch new features and optimize product prices to compete for a larger market share. Despite this, the development of intelligent and hidden camera technology, as well as the improvement of cloud storage and remote access functions, will continue to drive market growth.

The global Nanny Cam market size was estimated at USD 1770.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 7.60% during the
